PENNSYLVANIA PUBLIC LIBRARY STATISTICS

INTRODUCTION

The statistical report was compiled by the Division of Systems Development, Bureau of Information Systems, Pennsylvania Department of Education, from data selected from public library annual reports by the Library Development Division, State Library of Pennsylvania. It is divided into nine parts, each of which is subdivided into two or more tables.

Part I is arranged alphabetically by county and, within each county, by the name of the town, township, borough or city in which a library is situated. The responsibility of some libraries is identified in parentheses following the name of the municipality, e.g., (County Library), (City-County, DLC). DLC identifies libraries which have been designated district library centers in Pennsylvania's statewide system.

The number of libraries,branches and stations in each county and township library system is reported in parentheses following the name of the county or township, e.g., Dauphin County (9 libraries).

Part II, District Summaries, reports the total data for all libraries in each district.

Parts III and IV show how local libraries rank according to operating expenditures, population served, number of items in the materials collection, and items lent (circulation) during the year. The increase and decrease percentages were determined by a computer comparing this year's to last year's data. Where no increase or decrease is shown, no matching data for last year was available. An unusually large change indicates a special circumstance in one of the two years.

Part V is the list of the libraries for which data is included in the statistics. It is a useful source of library code numbers.

For libraries which operate on a July-June fiscal year, the statistics are for 1980-81. For most other libraries, the data is for 1980 except for a few for which earlier data has been repeated because they did not file reports this year. The repeated data is more valid than no data.

TABLE 1: ANALYSIS OF RESOURCES AND SERVICES

Population served: For a local library it is the 1980 population of the municipalities served freely. For members of library systems, it is the population which has predominant access to the library. In counties where overlapping service areas result in a total *population served* which is greater than the census figure, the county population from the *Local Effort and State Aid Projections*, compiled annually by the State Library, has been used as the county total. The population served by a *county library* generally is the difference between the total population of the county and the population served by the other libraries in the county.

Hours open: The figure is the predominant weekly schedule of the library, usually winter hours.

Registration: The two columns record the number of new borrowers registered to use the library during the year and the total as of the end of the year.

Staff: The numbers are full-time equivalents based on at least a 35-hour work week. The employees are classified by education or certification. The other category includes clerical people and others who do library work. Janitorial and maintenance employees are not included.

Volunteers: This year, the data for volunteers generally is reported in full-time equivalents, counting only those who regularly work five or more hours weekly. However, for some libraries the data continues to be the number of individual volunteers.

Books: The figures show the total number of items in the library's materials collection, including those of branches, bookmobiles and other outlets.

Periodicals: For individual libraries, generally the figure is the total number of titles, including newspapers, currently received by the library. In some cases, it may be the number of subscriptions.

Circulation: Reported are the total of books and other materials lent by the library during the year and the number of items lent per capita.

Interloans: The figures show the number of items of materials lent and borrowed by each library.

TABLE 2: ANALYSIS OF INCOME AND EXPENDITURES

INCOME

Local tax: Total tax income or appropriations from local government units and school districts. Also included is indirect federal aid. See below.

State aid: State aid received by a local library, county library, district center, and regional library center. Included are state funds received by the Carnegie Library of Pittsburgh and the Free Library of Philadelphia to operate libraries for blind and physically handicapped persons.

Federal aid: Money received under the Library Services and Construction Act and similar federal programs, excluding revenue sharing money.

Other: Funds received from all other sources such as endowments, United Fund, fund drives, gifts, fines, fees, and so on.

School districts: Receipts from school districts are reported under this heading and also are included under the heading of *Local Tax*.

Indirect Federal aid: Money not specifically intended for libraries received indirectly from federal programs through municipal governments or other agencies. Included are revenue sharing funds and the salaries of CETA employes assigned to the library. These amounts also are included under the heading of *Local Tax*.

EXPENDITURES

Wages and salaries: Wages, salaries and fringe benefits, including janitorial and maintenance staff.

Books and periodicals: The amount spent for books, periodicals and other library materials.

Other operating: Monies spent for utilities, rent, supplies and other miscellaneous purposes. The figure includes some expenditure for furniture, equipment, repairs and alterations.

Total operating: The sum of the previous three columns. All figures are recorded to the nearest dollar.

Operating per capita: The figure is based on the recorded operating expenditures.

Capital: It is supposed to be monies expended for land, new buildings, alterations or new additions which add new floor area, and for the initial furniture and equipment for the new area.

Operating expenditues by source of income: The three columns report the total funds spent from the local, state and federal income categories. Federal includes only Library Services and Construction Act and similar library program money. It does not include "indirect federal aid".

*Note: The 1980 populations are not comparable to those of 1979 because of the 1980 census.

#Note: The number of volunteers used by libraries during 1980 is not comparable to the 1979 or 1975 figures because the 1980 figure is equivalent to 443.7 people working 35 hours weekly. Only those people working five or more hours weekly, regularly, were to be reported. The 1979 and 1975 figures report the number of individual volunteers, not full-time equivalents, and with no limit on the number of hours worked.
